

Custom ERP Solutions: Puzzle By Your Needs

Experience seamless integration and efficiency with ERPuzzle.

Let's start!

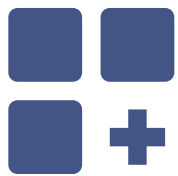

Receipt

Pick & Pack

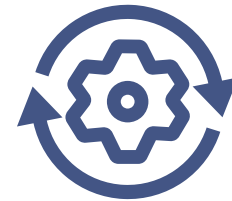

Dispatch

Awesome Features from ERPuzzle

Customizable Modules

Users can create a fully customised ERP system by selecting and configuring modules according to their business needs.

Seamless Integration

Supports various business processes and meets the needs of different business scenarios.

Security and Reliability

Attaches great importance to data security and uses advanced encryption and protection measures to ensure business continuity.

Flexible Plans

Depending on the number of modules and features selected, a wide range of pricing options are available to suit the needs of businesses of different sizes.

How It Works

ERPuzzle is a flexible and customisable ERP platform that allows users to freely choose the combination of modules they need, avoiding unnecessary complexity and enabling seamless integration and efficient operations.

Sign Up or Log In

Visit the ERP Puzzle website and click on the ‘Sign Up’ button to register. Fill in the necessary registration information to create a new account.

[Go to ERPuzzle](#)

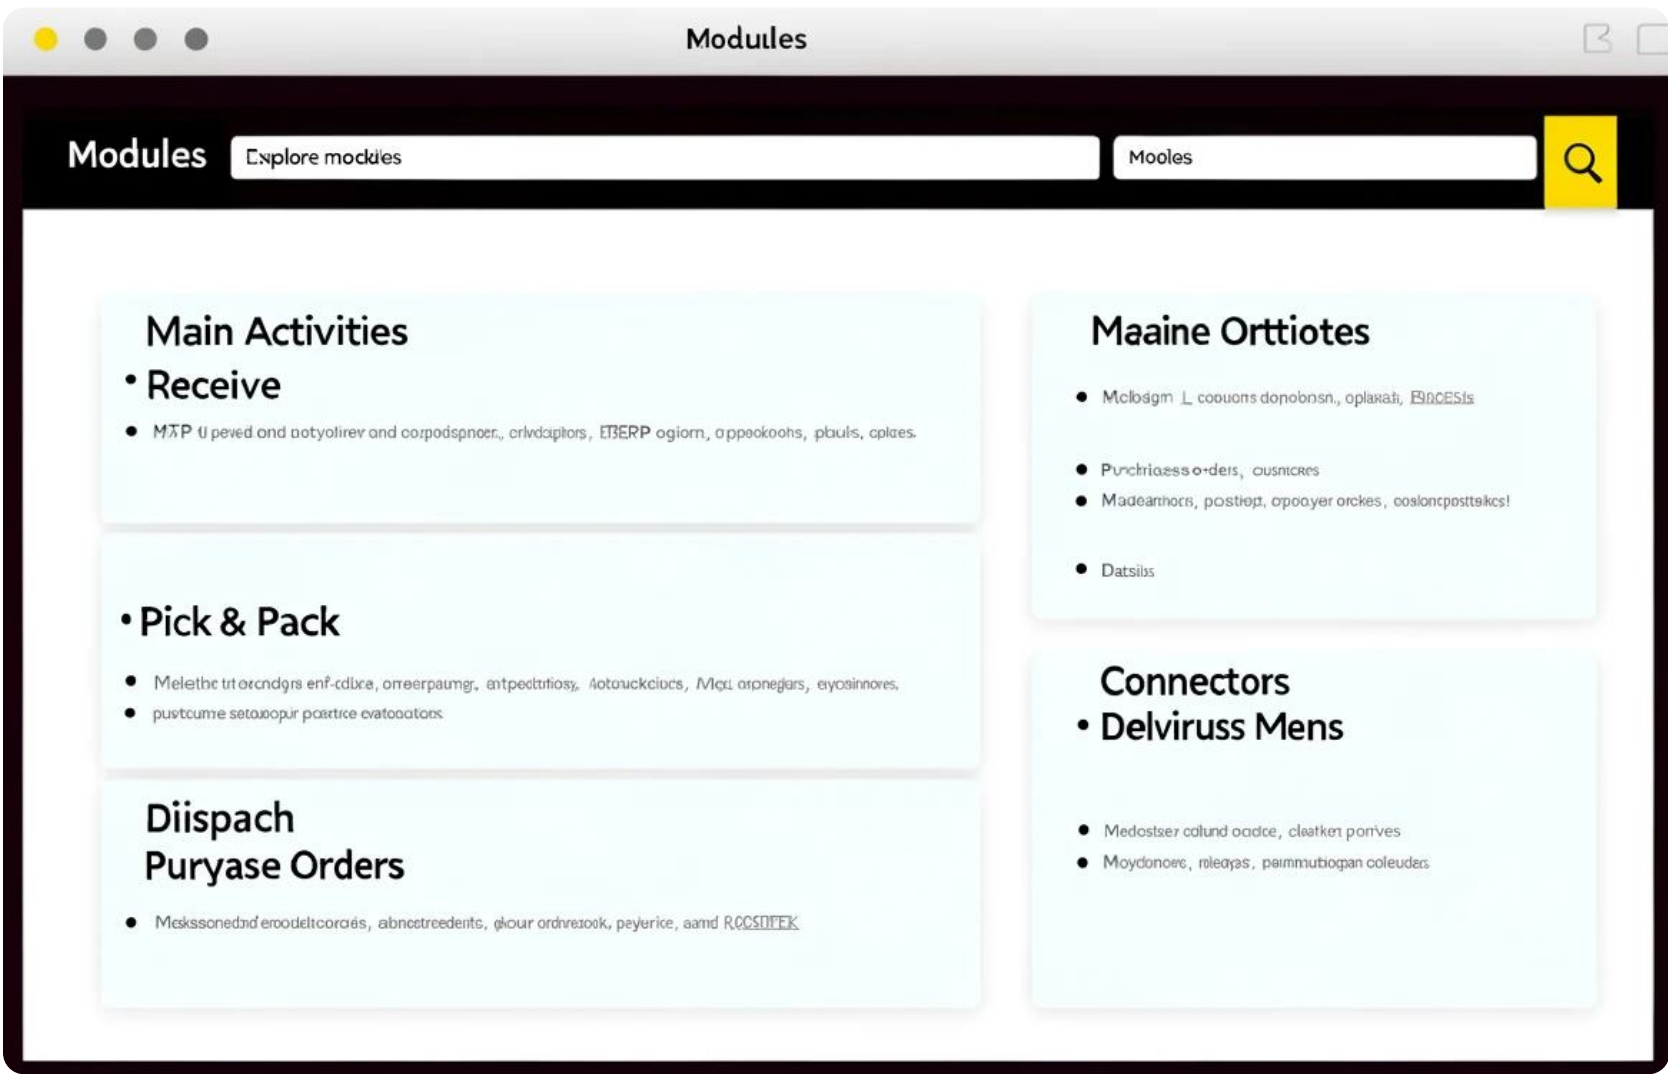

Explore Modules

Go to the ‘Modules’ page and browse:

- 1.main activities (e.g. Receive, Pick & Pack, Dispatch)
- 2.connectors (e.g. EmailSend, MqttSend, HttpSend)
- 3.data providers (e.g. Purchase Orders, Delivery Managers).

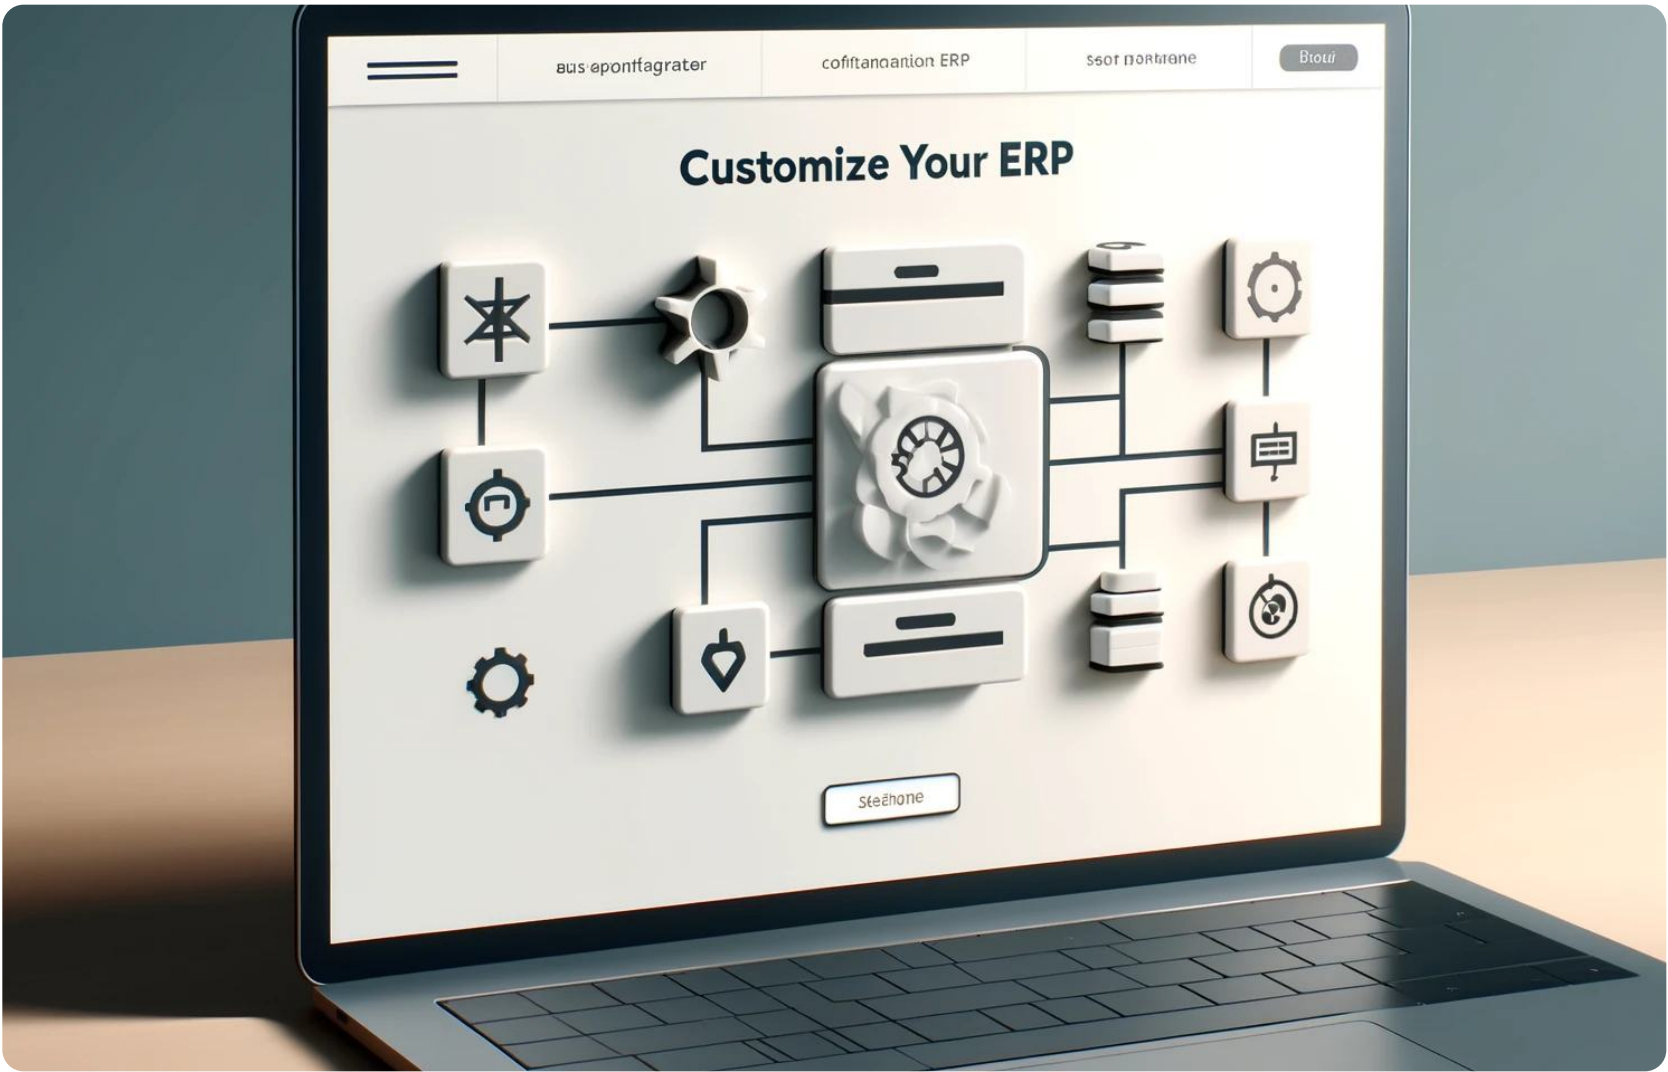

[Go to Mudules](#)

Customize Your ERP

Go to the ‘Configurator’ page and use the drag and drop interface to add the required modules to your ERP system. You are free to combine these modules according to your business processes.

[Go to Configurator](#)

Save and Implement

When you are done with the configuration, click the ‘Save’ button to save it. You can go back to edit and adjust at any time. Choose the pricing plan that suits your needs based on the number of modules and features you have selected.
